

# Minutes FSCL Meeting 2022/06/17

**Attendees:** Lyonel, Maximilian, Shawon, Urban, Urs, VB, Jule

**Minutes:** Jule

**Chairperson:** Urs

*Urs officially opens the session.*

## TOP 1 Freshmen

Everything seems fine. Idea: Maybe create a Telegram group for all IMS students.

## TOP 2 Answering mails

Last mails: ---

Email "Prüfungsverleih": Someone asked for old exams. We need to take action → s. TOP 4.

Email "Stellenausschreibung bei Sony": Offer for a HIWI job.

The other mails were classified as irrelevant.

**Urs** | Forwards Sony-mail to IMS students.

## TOP 3 Money spending

There are shopping lists on the white board in the SR room. **All** should add ideas to both lists. **Tilman** fills out stuvus application form for the table tennis table. **Jiwon** searches for the soft furniture things. **Urs** searches for the kitchen things. **Urban** looks for a nice plant in the Bauhaus.

Table tennis table: We have no information if Tilman made the application or if there's a confirmation from stuvus.

Urban bought a nice plant 😊. It costs 22€, the receipt is in the SR room. There are three paying options: (1) Take money out of safe. (2) Split the costs among us SRs. (3) Ask stuvus. As we don't have any income we are against option (1). Let's try to get the money from stuvus first. If this won't work option (2) should be fine as well.

Urs looked up the kitchen stuff. The list containing the links for forks, waffle + sandwich maker and cooking plate can be found in the WhatsApp group. As there are ice trays in the SR room we don't need to buy new ones.

Jiwon looked up the soft furniture stuff. The Google document (see link in WhatsApp group) contains links for pillows and blankets. At the end of the list is a note which ones we prefer.

**Shawon** | Fills out stuvus' application form. (Multiple sections: Plant, Kitchen stuff, Furniture stuff)

**???** | Still needs to search for a beanbag.

## TOP 4 Old exams

Problem: There are some exams in the folder which are probably not legal to distribute.

How should we distribute old exams?

- Old approach: Create a link and share it via email. → Problem: Students don't know which old exams are available. The procedure is somewhat unnecessary effort as it's always creating links to the same folders.
- ILIAS approach: Add links to ILIAS folder that can be accessed from members of this group. → Problem: We can't control access. Scans are not allowed to be in the list.
- New idea: Students are supposed to ask for old exams via mail. We share a "master link" that contains all folders of old exams which is either not time limited at all or e.g. limited for a duration of one semester. We should also note in the mail, that we are not responsible for the content of the documents – we only share the link to the collection provided by students.

Before deciding how we want to proceed in the future we need to know the amount of scans in the collection (meaning how many documents need to be replaced by manually transferring the content into memory protocols). If there's a small amount of scans we can remove them from the collection and use the ILIAS approach. If there's a large amount of scans we might go with the new idea and still rewrite important documents.

**Urban** | Checks for scan/memory-protocol ratio in old exams folder.

## TOP 5 StuKo

Topics:

- Increasing GPU capacity for IMS students.
- Need for code of conduct on how to use the servers.
- Lectures of Dr. Wokurek are better.

## TOP 6 Creative Writing AI magazine

Someone from the Linguistics department is planning a magazine that consists of stories about artificial intelligence. They reached out to us to ask about texts that are AI-generated.

Before agreeing on participating in the project we first need answers to several questions: Do they have datasets? Is there a timeline? What is the genre of texts? Which contents? ...

**Urban** | Meets with people who reached out to us.

## TOP 7 Drink dispensing

The new system is a "rotating Getränkekeasse".

*We postpone this topic.*

## TOP 8      HowToFachgruppe-document

Let's complete the entire document at the end of our sessions together. We should also distribute some tasks.

*We postpone this topic.*

## TOP 9      (Team) Events

We need to wait if we get the money back from the "social integration money".

We want to host games nights more often in the future.

Let's discuss next time if/when we want to do the next grilling event!

## TOP 10      Server Space

The wiping mechanism will happen starting from July. Urs spreads the information to the IMS students.

*Everything is progressing... 😊*

*Urs officially closes the session.*

---

Topics to keep in mind:

- Job fair: Organize to integrate some cl-companies to the job fair of computer science next semester.
