Minutes FSCL Meeting 2022/10/27

Attendees: Adem, Fabian, Jule, Marc, Max, Silvia, Sofia, Sven, Tilman, Urban, Urs, Yixuan

Minutes: Jule

Chairperson: Urs

Urs officially opens the session.

TOP 1   Freshmen

Tutorials: There have been more Bachelor students actively participating in the tutorial than last week. Let's hope they keep using this offer.

Some of the Master students were missing forms, but this problem should be solved by now.

We haven't heard of other freshmen-related problems.

TOP 2   Answering mails

Last mail: ---

There are no new relevant mails.

TOP 3   "Abrechnung"

Receipts from the introductory events are in the Getränkekasse. **Marc** & **Shawon** do the "Abrechnung" together.

To get the money back we need to hand in a list of students who participated in the Erstie-events. Stefanie should have a list of students who registered for the introductory events. Urs has a list containing all freshmen.

| **Marc** | Asks Stefanie for the list and hands in the final list. |

TOP 4   Buying Stuff

Games night: 04.11.2022. **Urban** makes money application for 25€.
Table tennis table: Plan is to buy a new one. **Urs** checks if applications expire.
Kitchen stuff: Sandwich maker + hot plate. **Sven** makes money application for 40€ + 40€.
Cloth bags: 50€ were confirmed for the Ersties. **Urs** checks if this money can be used not only for Ersties.
Stickers

Games night: Urban made the application, but we don't have an answer yet.

Table tennis table: Urs found the application again and it's still open. We are not sure if applications do have an expiration date.

Kitchen stuff: Sven made the application in such way that stuvus should buy it based on the links he provided. Stuvus replied mentioning that there might be some issues with the hot plate and the Brandschutz. As we want to keep the hot plate inside of our SR room and only use it carefully for events this hopefully shouldn't be a problem.

Other ideas for spending money:
- Chairs for the SR room: Before buying new chairs we should first check if there are any chairs left within the institute.
- Beanbag: 7 of us are in favor and 2 were abstaining for applying for a beanbag (below 75€).
- Christmas decoration: A singing Christmas tree that gets aggressive when you try to plug it out.

Urs	Takes a look into expiration dates of applications and emails stuvus that we still want to order the table tennis table.
Urban	Checks for a link of a beanbag (below 75€).

TOP 5   Session Slot
Result of a survey determines the regular SR session slot. **Lyo** creates a doodle.

The dates in the Doodle are the ones from this week. Whoever still wants to fill out the poll please tell Lyo your preferences such that he can take it into consideration when looking at the poll results. The new session slot will be decided on Sunday.

All	Fill out the Doodle/tell your preferences.

TOP 6   (Team) Events
Games night: 04.11.2022.
Pub crawl: 18.11.2022. **VB** creates a google document and sends email with it to students.
Climbing: In December. **Marc** checks for possible dates and gets a poll-creator to do a doodle.

Halloween: Some of us want to do something on Monday (31.10.2022) in the evening together. Let's just meet and plan then what to do / where to go.

Christmas Party: There should be a Christmas party this year! We need to figure out a date. Let's make a poll where we can enter when we are planning to leave Stuttgart/we assume the internationals might leave. We shouldn't spam all students with this kind of poll. Thus let only us SR participate in it. Additionally we could make a poll on Discord where also other IMS-students could show their opinion.

IMS-weekend:
- Idea: Let's organize a winter-weekend for 3 days / 2 nights (over the weekend, from Friday till Sunday) in the black forest (reachable via public transportation) around January/February. It's supposed to be open for all IMS-students and of course former IMS students (including Fabian).
- We need to plan this weekend! => Lots of information can be found in the stuvus-wiki download-section.
- It would be great to get some financial support from stuvus:

- o   If we comply with stuvus' sustainability guideline for food we should get some additional support.
  - o   For buying food it would be possible to apply for a Metro-card via stuvus.
  - o   In case we need a car, stuvus might have special conditions with Stadtmobil.
  - o   We can borrow things like a sound system from stuvus.
- Problem: It's hard to estimate how many students might be interested in participating in an IMS-weekend. (But: This estimate is somewhat needed to be able to calculate the price for accommodation and food.) We might want to create a poll beforehand to just check the general interest without details on the weekend itself. There should be multiple options available in the poll, e.g. "YES I want to participate if it costs less than X€", "NO I'm not interested in participating". We could also let them state a preferred date.
- Next week we should make a time-plan with milestones and start delegating tasks.

Urban	Reminds VB [to create the google document and send the invitation for the games night & pub crawl to the students].
Max	Creates a doodle asking when students are leaving for Christmas.
Fabian	Checks for how much in advance we need to apply for stuvus supporting student-weekends.
Sven	Creates a google document asking for the general interest of IMS students in participating in an IMS-weekend. Creates a google document with TODOs (= things we need to consider when planning an IMS-weekend).
Max & Marc	Take a look into stuvus' financial support for food and figure out a rough estimate of the amount of money we need to spend for food.
Sofia & Urban	Take a look into possible dates and accommodations.

TOP 7   Old protocols (Nextcloud)

In the last days there was an error message showing that the storage where we keep the old exams is almost full. The problem resolved itself. Maybe it was just an error in the entire cloud.

By now the old exams are stored in Fabian's folder. Theoretically we could move the documents into another folder but we don't want to do this as the links to the documents would change and students would need to get a new access link created.

We close this topic.

Urs officially closes the session.

Topics to keep in mind:
- Job fair: Organize to integrate some cl-companies to the job fair of computer science next semester.
